

Milan Gautam

Frontend Developer & Penetration Tester

✉ gautammilan2024@gmail.com ⌂ Kathmandu, Nepal

PROFESSIONAL SUMMARY

Security researcher and bug bounty hunter specializing in discovering real-world web application vulnerabilities. I've reported 30+ issues across HackerOne, Intigriti, and Bugcrowd, using both manual testing and automated reconnaissance to uncover OWASP Top 10 and business logic flaws. I also build secure, responsive web applications, combining offensive skills with practical development experience.
